MicroPilot®

World Leaders in Small UAV Autopilots

Professional UAS Autopilots

MicroPilot
World Leader in Professional UAS Autopilots

1994

MicroPilot
incorporated

1998

MP2000
MicroPilot's first
UAV autopilot

2003

MP2028^g, a 28
gram autopilot

2003

Introduced
HORIZON^{mp}
Ground Control
Station Software

2004

Move to Stony
Mountain and
opened Flight
Facility

2004

Introduced
XTENDER^{mp}
software
developer's kit

2005

launched
MP2128^g high
performance
UAV autopilot

2006

Introduced
LRC Dual
Frequency
autopilots

2007

MP2128^{heli}
Rotary wing
autopilot

2008

Introduced
trueHWIL
highest fidelity
simulator

2009

ISO9001
Certified

2010

Introduced
MP2128^{3x} triple
redundant
autopilot

2011

MP2128^{g2}
second
generation high
performance
UAV autopilot

2012

Helicopter Auto-
rotation, Tumble
Recover

2013

Introduced
Xtender^{Validate}

What we make

MicroPilot®
World Leader in Professional UAS Autopilots

MP2128^{LRC}

MP2128^{3X}

AUTOPILOT

- ❑ Professional UAV autopilots
- ❑ Made to the highest standards
- ❑ Different models for various application
 - Helicopter, fixed wing, multi-rotor, surface vehicle and airship
 - Board level or enclosed
- ❑ Manufacturers are our primary market

Family of UAV Autopilots

MicroPilot[®]
World Leader in Professional UAS Autopilots

Triple Redundant
Autopilots

MP2128^{3X}

Enclosed
Autopilots

MP2128^{HELI2-LRC}

MP2128^{LRC}

Board of Autopilots

MP2128^{HELI2}

MP2128^{g2}

MP2028^{g2}

MP1028^{g2}

Capability

2128^{3X} Triple redundancy UAV autopilot

MicroPilot[®]
World Leader in Professional UAS Autopilots

- ❑ First and only triple redundant UAV autopilot for fixed wing and helicopter platforms
- ❑ Three full autopilots
- ❑ Advanced voting logic
- ❑ Redundant communication channels
- ❑ Three GPS receivers
- ❑ Synchronization – smooth transition between autopilots

- ❑ Team of multi discipline developers
- ❑ Ongoing development of new capabilities
- ❑ Nightly checks on code built during the day
- ❑ Custom software and hardware for specific customer needs
- ❑ In-house or at customer's location

- ❑ **Team of multi discipline developers**
- ❑ **Ongoing development of new capabilities**
- ❑ **Nightly checks on code built during the day**
- ❑ **Custom software and hardware for specific customer needs**
- ❑ **In-house or at customer's location**

Professional Grade Manufacturing

MicroPilot[®]
World Leader in Professional UAS Autopilots

- ❑ IPC-3 highest reliability circuit board
- ❑ ISO9001 Certification
- ❑ 20 years' experience
- ❑ Tested -60C to +90C and to 70G
- ❑ Extremely low failure (<0.5%)
- ❑ Automated calibration -40C to 85C
- ❑ Up to 10 calibration points, ESS, conformal coating, underfill and final checks
- ❑ Automated calibration – consistency between autopilots

Professional Tools for Customization

MicroPilot[®]
World Leader in Professional UAS Autopilots

- ❑ **Horizon GCS**
- ❑ Mission simulator for testing and training purposes
- ❑ Point and click interface runs on Windows
- ❑ Multiple UAV profiles
- ❑ Operator can monitor autopilot, change waypoints, upload new flight plans, initiate holding patterns, adjust feedback loop gains during flight

- ❑ **Xtender SDK**
- ❑ Develop custom software to run parallel on autopilot hardware
- ❑ Develop interfaces to critical onboard devices

trueHWIL

MicroPilot®
World Leader in Professional UAS Autopilots

- ❑ Highest fidelity simulator available
- ❑ Electrically simulates all autopilot sensors
- ❑ Perfect tool for building iron bird

Professional UAV Autopilots
